

# Taking multiple medications?

Our RxMap® packaging can make your life easier again!

Just ask our pharmacist to see how easy it is to get all of your medications combined into one easy-to-use card. Each card contains medications in a convenient, tamper evident, easy-to-use punch card.

Some things in life can be complicated, but taking medication properly should not be one of them. RxMap (multi-med adherence packaging) makes the process of taking and administering medications easier, while also improving medication adherence.
